## **Bradleys', Inc. Earns Re-Approval of EASA Accreditation**

ST. LOUIS, MO, USA – September 9, 2021 – FOR IMMEDIATE RELEASE – Bradleys', Inc., in Gregory, Texas, has been re-approved through a third-party audit as an EASA Accredited Service Center.

Bradleys' has demonstrated that it continues to follow the prescribed good practices to consistently deliver quality electromechanical repairs that maintain or improve AC electric motor efficiency and reliability. The firm was initially accredited in 2015 and was required to submit self-audit documentation for each of two years afterward, followed by the on-site audit recently completed. The firm has completed this process twice.

“This re-approval affirms the company’s continuing commitment to excellence,” said Linda Raynes, CAE, EASA President & CEO. “It offers external validation that Bradleys’ adheres to good practices by submitting to an independent, third-party audit, on a triennial basis.”

The criteria for becoming EASA Accredited are based on *ANSI/EASA AR100: Recommended Practice for the Repair of Rotating Electrical Apparatus* and *The Good Practice Guide of The Effect of Repair/Rewinding on Motor Efficiency*.
